

## INDEX TO VOL. II.

**A** BEL, J. J. On epinephrin, the active constituent of the suprarenal capsule, and its compounds, iii.

ABEL, J. J. On the formation and composition of highly active salts of epinephrin, iv.

Absorption of proteids, 137.

ALBRO, A. H. See CHITTENDEN and ALBRO.

Animal extracts, action on heart, 270, v.

**B**ACTERIA, fluorescent, xviii.

Bacterial cultures, action on heart, 288.

BAUMGARTEN, W. Infarction in the heart, 243.

Bile, relation to pancreatic juice, 485.

Bladder, urinary, innervation, 482.

Blood, coagulation influenced by proteids, 153.

—, cholesterin, 306.

—, influence of massage on corpuscles, xxi.

Brain, vasomotor nerves, xii.

BROWN, E. W. A note on the cholesterin-esters of birds' blood, 306.

**C**ARDIO-INHIBITORY centre, 449.

CATELLI, J. McK. Instruments for the study of movement and fatigue, xx.

Cerebrum, development, xv.

Chemotaxis, 355.

CHITTENDEN, A. S. On the solution of mercury in the body-juices, vi.

CHITTENDEN, R. H. A convenient form of sphygmograph, xx.

CHITTENDEN, R. H. The behavior of inulin in the gastro-intestinal tract, xvii.

CHITTENDEN, R. H., and A. H. ALBRO. The formation of melanins or melanin-like pigments from proteid substances, 291.

CHITTENDEN, R. H., L. B. MENDEL, and V. HENDERSON. A chemico-physiological study of certain derivatives of the proteids, 142.

Cholesterin-esters, 306.

Cholin, in intestine, viii.

Chronoscope, xiv.

CLIFFORD, A. The action of animal extracts, bacterial cultures, and culture filtrates on the mammalian heart muscle, 273.

CLIFFORD, A. The physiological action of extracts of the sympathetic ganglia, 471.

Color, demonstration methods, xx.

Coronary arteries, closure, 263.

Coronary arteries, distribution, 248.

Cortex, nerve cells, ameboid movements, xiii.

**D**EGEUTATION, 206.

Dendrites, ameboid movements, xiii.

DREYER, G. P. On secretory nerves to the suprarenal capsules, 203.

**E**LECTRODE, non-polarizable, xx.

—, Epinephrin, iii, iv.

Etherizing bottle, x.

**F**ITZ, G. W. A new chronoscope, xiv.

Flicker photometer, xx.

**G**ODDARD, H. H. See HODGKIN and GODDARD, xii, xix.

GREENL, C. W. On the relation of the inorganic salts of blood to the automatic activity of a strip of ventricular muscle, 82.

**H**EART, accelerator nerves, 395, ix.

—, anemia, 257.

—, cause of contraction, 47.

—, conduction within, 104.

—, coordination, 127.

—, Engelmann's incisions, 134.

—, fatigue, 121, 414.

—, infarction, 243.

—, inhibitory nerves, 395.

- Heart, normal sequence, 69.  
 —, nutrient solutions, 57, 82.  
 —, perfusion method, 274.  
 —, reaction to animal extracts, bacterial cultures, culture filtrates, 273, v.  
 —, reflex acceleration, 429.  
 —, synchronism of ventricles, 131.  
 —, tone waves, 73.  
 —, voluntary control, 463.  
 —, work done, 113.
- HENDERSON, S. See CHITTENDEN, MENDEL, and HENDERSON.
- Hippuric acid, xiv.
- HODGE, C. F., and H. H. GODDARD. A new brain microtome, xix.
- HODGE, C. F., and H. H. GODDARD. Possible amoeboid movements of the dendritic processes of cortical nerve cells, xiii.
- HOWELL, W. H. A convenient form of non-polarizable electrode, xx.
- HOWELL, W. H. On the relation of the blood to the automaticity and sequence of the heart-beat, 47.
- HUBER, G. C. Observations on the innervation of the intracranial vessels, xii.
- HUBER, G. C. A note on sensory nerve-endings in the extrinsic eye muscles of the rabbit—atypical motor-endings of Retzius, xvi.
- HUBER, G. C. Methylene-blue preparation of sensory nerve-endings in tendon—Golgi's tendon corpuscles, xx.
- HUNT, R. Direct and reflex acceleration of the mammalian heart, ix.
- HUNT, R. Direct and reflex acceleration of the mammalian heart, with some observations on the relations of the inhibitory and accelerator nerves, 395.
- I**NFARCTION of heart, 243.  
 Inulin, xvii.
- Iodine, organic compounds, xv.
- JACKSON, H. C. See MENDEL and JACKSON, L.
- JENNINGS, H. S. Studies on reactions to stimuli in unicellular organisms. II. The mechanism of the motor reactions of Paramecium, 311.
- JENNINGS, H. S. Laws of chemotaxis in paramecium, 355.
- JONES, W. The chemistry of the melanines, 380, vi.
- JORDAN, E. O. The production of fluorescent pigment by bacteria, xviii.
- K**YNURENIC acid, excretion, i.
- LATIMER, C. W. On the modification of rigor mortis resulting from previous fatigue of the muscle, in cold-blooded animals, 29.
- LEE, F. S. A new respiration apparatus, xx.
- LEE, F. S. A simple oncometer, xx.
- LEE, F. S. The nature of muscle fatigue, xi.
- LEVENE, P. A. Iodine in the tissues after the administration of potassium iodide, xv.
- LEVENE, P. A., and I. LEVIN. Preliminary communication on the absorption of proteids, xvii.
- LEVIN, I. See LEVENE and LEVIN, xvii.
- Liquids, animal, molecular concentration and electrical conductivity, xxi.
- LOMBARD, W. P. An improved form of Ellis's piston recorder, xx.
- LUSK, G., and F. H. PARKER. On the maximum production of hippuric acid in rabbits, xiv.
- Lymph flow influenced by proteids, 162.
- M**ELANINS, 291, 380, vi.
- MELIZER, S. J. On the causes of the orderly progress of the peristaltic movements in the oesophagus, 266.
- MENDEL, L. B. On the paths of absorption for proteids, 137.
- MENDEL, L. B. On the paths of absorption from the peritoneal cavity, 342, xvi.
- MENDEL, L. B. See CHITTENDEN, MENDEL, and HENDERSON, 142.
- MENDEL, L. B., and H. C. JACKSON. On the excretion of kynurenic acid, i.
- Mental life, physiological basis, xx.
- Mercury, solution in body, vi.
- Microtome, xix.
- MILLS, W. Correlation of the functional and anatomical development of the cerebrum, xv.
- MICHELL, J. K. Influence of massage upon the number of blood globules in the circulating blood, xxi.
- MOOK, W. A. See WALLACE and MOOK, v.
- MÜNSTERBERG, H. The physiological basis of mental life, xx.
- Muscle fatigue, xi.
- Muscle, tonus, xxi.
- MUSKINS, L. J. J. An instrument for measuring muscular tonicity in man, xxi.

**N**ERVE cells, ameboid movements, xiii.  
Nerve-endings, xvi.  
Nerve, local effects of stimulation, 411.  
Nerves, secretory, suprarenal, 203.  
NESBITT, B. On the presence of cholin  
and neurin in the intestinal canal during  
its complete obstruction, viii.  
Neurin, in intestine, viii.

**O**DORS, confusion with taste, xx.  
Esophagus, peristalsis of, 266.  
Oncometer, xx.  
Oxygen, lack of, physiological effects, 220.

**P**ANCREATIC fistula, 484.  
Pancreatic juice, diastatic action, 483.  
Paramecium, affected by temperature, lack  
of oxygen, and poisons, 220.  
Paramecium, motor reactions, 311, 355.  
**P**ARKER, F. H. See LUSK and PARKER,  
xiv.  
**P**ATRICK, G. T. W. Confusion of taste and  
odors, xx.  
Peritoneum, absorption from, 342, xvi.  
Proteid cleavage products, chemical nature,  
168.  
Proteid cleavage products, their physiolog-  
ical effect, 142.  
Proteids, absorption, 137, xvii.  
Pigment, fluorescent, xviii.  
Piston-recorder, xx.  
**P**ORTER, W. T. The coordination of the  
ventricles, 127.  
Proceedings of the American Physiological  
Society, iii.

**R**ACHFORD, B. K. The diastatic action  
of pancreatic juice, 483.  
Respiration apparatus, xx.  
Respiratory centre, "Traubé" waves, 352.  
Rigor caloris, 43.  
Rigor mortis, influenced by fatigue, etc., 29.  
Roots, O. N. On the flicker photometer, xx.

**S**CRIPTURE, E. W. Methods of de-  
monstrating the physiology and psy-  
chology of color, xx.  
SCRIPTURE, E. W. New laboratory appa-  
ratus, xx.  
Sphygmograph, xx.  
Spinal cord, micturition centre, 188.  
Spinal cord, path of bladder impulses, 107.  
**S**TEWART, C. C. A simple etherizing  
bottle, x.  
**S**TEWART, C. C. On the course of impulses  
to and from the cat's bladder, 182.  
**S**TEWART, G. N. Experiments on the  
molecular concentration and electrical  
conductivity of certain animal liquids, xxi.  
Suprarenal secretory nerves, 203.  
Sympathetic ganglia, action of their ex-  
tracts, 471.

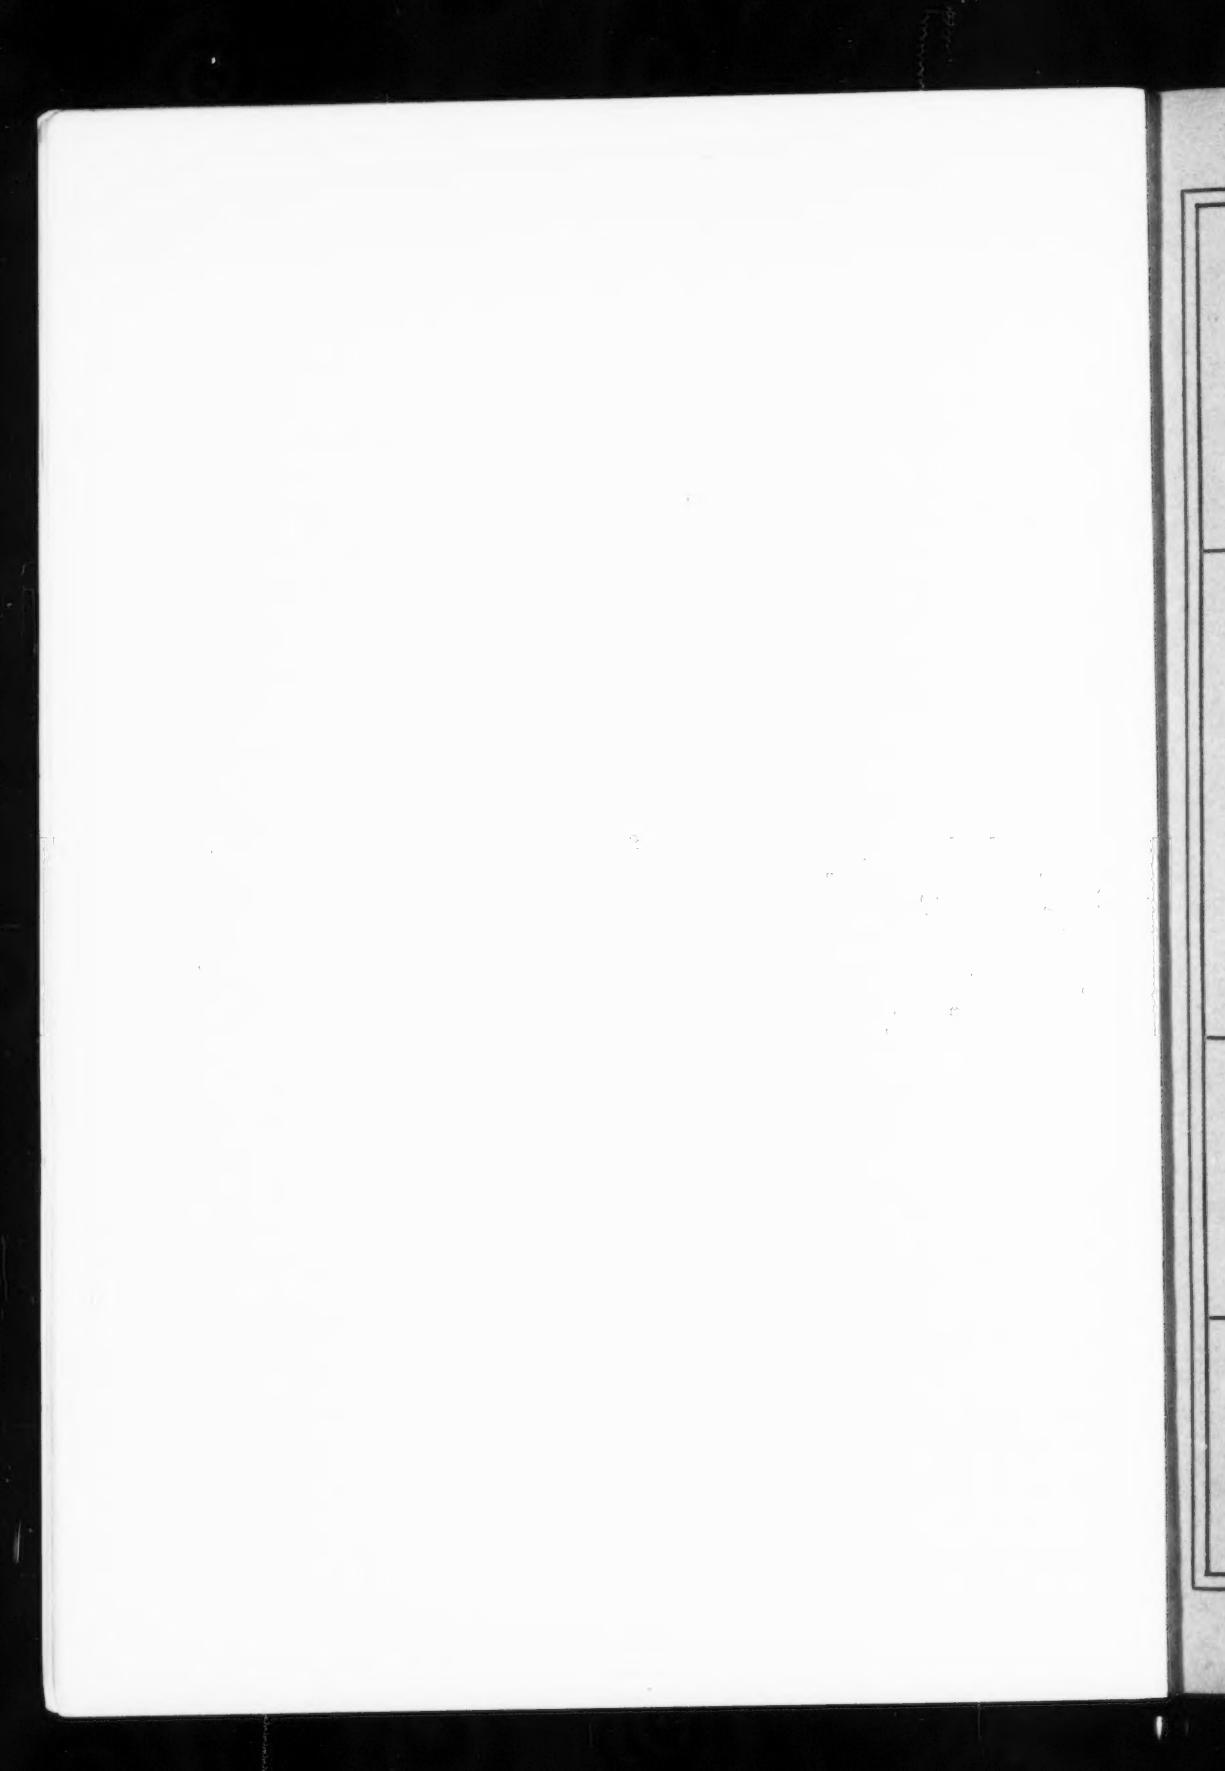

**T**ASTE, confusion with odors, xx.  
Temperature, high, physiological  
effects, 220.  
Terminal arteries, 245.  
"Traubé" waves, 352.

**U**NICELLULAR organisms, reaction  
to stimuli, 311, 355.  
Urine secretion influenced by proteids, 164.

**V**ASOMOTOR nerves, brain, xii.

**W**ALLACE, G. B. and W. A. MOGG.  
The action of suprarenal extract on  
the mammalian heart, v.  
**W**OOD, H. C., Jr. The origin of the  
"Traubé" waves, 352.

**Z**OETHOUT, W. D. On some analogies  
between the physiological effects of  
high temperature, lack of oxygen,  
and certain poisons, 220.

THE AMERICAN  
JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

BY

H. P. BOWDITCH, M.D., BOSTON

FREDERIC S. LEE, PH.D., NEW YORK

R. H. CHITTENDEN, PH.D., NEW HAVEN

JACQUES LOEB, M.D., CHICAGO

W. H. HOWELL, M.D., BALTIMORE

W. P. LOMBARD, M.D., ANN ARBOR

W. T. PORTER, M.D., BOSTON

VOL. II.—No. V.

*Issued July 1, 1899*

BOSTON, U.S.A.

GINN AND COMPANY

1899

## CONTENTS.

---

DIRECT AND REFLEX ACCELERATION OF THE MAMMALIAN HEART, WITH SOME OBSERVATIONS ON THE RELATIONS OF THE INHIBITORY AND ACCELERATOR NERVES. <i>By Reid Hunt</i> . . . . .	395
THE PHYSIOLOGICAL ACTION OF EXTRACTS OF THE SYMPATHETIC GANGLIA. <i>By Allen Cleghorn</i> . . . . .	471
THE DIASTATIC ACTION OF PANCREATIC JUICE. <i>By B. K. Rachford</i> .	483

---

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars. To subscribers in other countries, five dollars and twenty-five cents ( $\text{£}1\ 2s.$ ; marks, 22; francs 27), payable in advance.

---

Subscriptions, manuscript, and all other communications should be sent to Dr. W. T. PORTER, 688 Boylston Street, Boston, Mass., U.S.A.

---

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

---

*The American Journal of Physiology is represented:*

In America, by GINN & COMPANY,   In France by JULES PEELMAN, 9 Tremont Place, Boston, Mass.   2 Rue Antoine-Dubois, Paris.
In Germany by R. FRIEDLÄNDER & SOHN, Berlin, N.W., Caristrasse 11.

---

Copyright, 1890, by GINN & COMPANY.

---

Printed by John Wilson and Son, at the University Press, Cambridge, Mass.

Entered at the Post Office at Boston and admitted for transmission through the mails  
at second class rates.
